## EDUCATION

### Imperial College London

London, United Kingdom

**Degree:** Bachelor of Engineering – BEng, Computing

Sep 2023 – Jun 2026

**Grade:** First-Class Honours (Year 1, Year 2)

## SKILLS

**Languages:** Native: English, Mandarin, Cantonese

**Programming Languages:** C, Haskell, HTML/CSS, Java, Kotlin, Prolog, Python, Scala, SQL, TypeScript, YAML

**Databases:** Firebase, Milvus, MongoDB, MySQL, Supabase

**Frameworks:** Django, Expo, FastAPI, Flask, Jest, JUnit, LangChain, React Native, ScalaTest, Streamlit

**Developer Tools:** CI/CD (GitHub/GitLab), CMake, Docker, GDB, Git, JetBrains, Linux, Node.js, Valgrind, Vercel, VS Code

## EXPERIENCE

### Software Engineer Intern

Jul 2025 – Present

#### HubSpot

London, United Kingdom

- Placeholder

### Software Engineer Intern

Aug 2024 – Oct 2024

#### Midas Advisory

London, United Kingdom

- Automated non-operating expense data processing from the top 15 U.S. banks using open-source LLMs, web scraping, data-source APIs, and Ray parallelisation, cutting processing time from hours to minutes and boosting accuracy to 97%.
- Implemented a Milvus vector-database with BAAI/bge-m3 embeddings and RRFRanker hybrid search, pairing a 93% accurate small LLM for data retrieval with a large LLM to deliver structured insights at enterprise scale reliably.

### Research Intern

Jul 2023

#### Department of Computer Science, City University of Hong Kong

Hong Kong

- Achieved 92.5% accuracy in GDPR compliance detection across 400+ websites by developing a GDPR compliance checker extension utilising BeautifulSoup4, LangChain, and OpenAI's LLM for automated analysis of a website's privacy policy.
- Increased daily active users by 45%, improved user-reported understanding (from 3.2 to 4.7/5), and boosted successful data erasure requests by 150% (100+ in first month) through a one-click feature that automates sending requests to websites.

## PROJECTS

### Team Up London | TypeScript, React Native, Expo, Supabase, Google Maps API, Vercel

May 2025 – Jun 2025

- Built a full-stack mobile application using React Native and TypeScript with Supabase backend, enabling recent graduates and working professionals to discover social sports communities and impromptu games, serving 20+ active users.
- Established a complete CI/CD pipeline with Jest testing, Expo EAS Build for cross-platform app generation, and Vercel-hosted distribution platform, implementing agile methodology with iterative design-feedback cycles.

### WACC (Compiler Project) | Scala

Jan 2025 – Mar 2025

- Developed a WACC compiler frontend, building a lexer and parser for syntax analysis, creating an abstract syntax tree representation, implementing a symbol table for semantic checks, and designing descriptive error reporting to aid debugging.
- Implemented the backend using TAC intermediate representation with ARM32/AArch64 support, architecture-specific dependencies, code optimisations (constant propagation, folding, control flow analysis), and a standard math library.

### PintOS (Operating Systems Project) | C

Oct 2024 – Dec 2024

- Enhanced OS kernel functionality by implementing timer-based thread synchronisation, advanced priority scheduling with priority donation, and the BSD scheduler, ensuring efficient multitasking and thread management.
- Developed a virtual memory subsystem, including paging, frame management with second-chance eviction, and supplementary page tables, enabling support for user programs, memory-mapped files, and stack growth.

### ARMv8 Emulator, Assembler, and Visualiser | C

May 2024 – Jun 2024

- Engineered a cycle-accurate ARMv8 emulator and two-pass assembler, implementing precise register, memory, and instruction management including robust error handling in compliance with ARMv8 specifications.
- Developed a SDL2-based GUI for real-time emulation visualisation, featuring drag-and-drop assembly parsing and dynamic rendering of CPU states, registers, memory maps, and ALU.

### AI Research Agent | Python

Aug 2023 – Sep 2023

- Developed a AI research agent using LangChain, OpenAI's LLM, Serper API, BeautifulSoup4, and X API for automated search, web scraping, cited summaries, and content posting. Integrated MongoDB Atlas for geolocation tracking.
- Implemented a Streamlit web app enabling anyone to use the AI research agent, integrating geospatial visualisation to map worldwide usage using geolocation data stored in MongoDB Atlas. Analysed engagement patterns of 70+ global users.
