EDUCATION

Imperial College London

London, United Kingdom

Degree: Bachelor of Engineering – BEng, Computing

Grade: First-Class Honours (Predicted)

EXPERIENCE

Software Engineer Intern

Aug. 2024 – Present

Sep. 2023 - Jun. 2026

Midas Advisory | Python

London, United Kingdom

- Engineered a modular app for processing non-operating expense data of the top 15 U.S. banks by integrating open-source LLMs, web scraping tools (Playwright, BeautifulSoup4, Selenium), and APIs (Requests). Reduced data collection time from hours to minutes and increasing accuracy from 85% to 97%.
- Decreased data retrieval time from minutes to seconds by implementing a vector database (Milvus) with embeddings; engineered a dual-model system using a small LLM for 93% accurate data filtering and a large LLM (LLama 3.1) for schema-based reporting.
- Developed an adaptable architecture that seamlessly integrates new models, enhancing market intelligence and banking sector
 analysis capabilities to support informed decision-making across departments.

Research Intern

Jul. 2023 - Jul. 2023

Department of Computer Science, City University of Hong Kong | Python

Kowloon, Hong Kong

- Achieved 92.5% accuracy in GDPR compliance detection across 400+ websites by developing a GDPR compliance checker extension with a distinguished professor, utilising BeautifulSoup4, LangChain, and OpenAI's LLM for automated analysis.
- Increased daily active users by 45% and improved user-reported compliance understanding from 3.2 to 4.7 on a 5-point scale by designing a user-friendly interface displaying website GDPR compliance status, enhancing data privacy awareness.
- Boosted successful data erasure request rate by 150%, processing 100+ requests in the first month by creating a one-click feature for automated data erasure requests, streamlining the exercise of GDPR rights.

PROJECTS

ARMv8 Emulator, Assembler, and Visualiser | C

May. 2024 - Jun. 2024

- Engineered a cycle-accurate ARMv8 emulator and two-pass assembler in C, implementing precise memory management and robust error handling per ARMv8 specifications.
- Developed a multi-threaded SDL2-based GUI for real-time emulation visualisation, featuring drag-and-drop assembly parsing and dynamic rendering of CPU states, registers, and memory maps.

Chess AI | Kotlin

Dec. 2023 – Jan. 2024

• Developed a Kotlin AI for a pawn race chess game, implementing complete game logic, move validation, and an ASCII terminal interface. Optimised AI decision-making using a depth-limited minimax algorithm with alpha-beta pruning.

AI Research Agent | Python, NoSQL

Jul. 2023 - Aug. 2023

- Developed a Python AI research agent using LangChain, OpenAI's LLM, Serper API, BeautifulSoup4, and X API for automated search, web scraping, cited summaries, and content posting. Integrated MongoDB Atlas for geolocation tracking.
- Implemented Streamlit app with geospatial visualisation pipeline to map worldwide AI agent usage, analysing engagement patterns of 70+ global users using MongoDB Atlas geolocation data.

Honours and Awards

1st Place – G-Research London Coding Challenge 2024

Sep. 2024 - Sep. 2024

Issued by G-Research

• Achieved First Place among 40+ contestants in the G-Research London Coding Challenge, a 3-hour programming contest where participants compete to achieve the highest score on a given problem.
